

# BRUSH SPIDER

## Series BS8300

The EDWARDS BRUSH SPIDER now enables you to clean around trees and in between trees in orchard rows without extra tractor trips or hand raking. The BRUSH SPIDER sweeps prunings, leaves and other debris from the tree rows and into the path of a mower or shredder. It is built with durable polyurethane sweeping fingers to provide long life with action that is gentle on trees and irrigation risers. This unit can be attached to the side of an offset mower, on a loader in place of the bucket or on a 3-point hitch. We offer 4 different types of sweeping heads. The orchard head has the sweeping fingers on a slight angle on the polyurethane fingers. The vineyard style the sweeping fingers are set in a vertical position, this keeps the long canes from wrapping up. The other two styles are similar to a gutter broom with a nylon or metal sweeping fingers, they have a slight angle and a continuous brushes. Brush Spiders are currently working in many fields from apple orchards, blueberries, vineyards, blackberries, and many more.

- \* Attaches quickly and easily to Edwards Front Mount 3-Point Hitch for good visibility and maneuverability.
