

3 POINT

# DYNA-TRIM

## Series DT5400

### Mows hard to reach areas between trees or posts!

The Edwards DT5400 Series DYNA-TRIM is a low profile mower designed for trimming around trees, posts, sprinkler heads, or other obstacles, eliminating the need for cross mowing. The 31 inch blade cuts 2 inches inside the outer protective tire. The tire moves around obstacles by contact or with hydraulic power as the operator chooses to meet conditions. Check the features listed below. Perhaps the DYNA-TRIM is the answer to some of your hard to reach mowing.

- Hydraulic system is entirely self-contained and continuously filtered.
- Rotor suspension permits riding over obstacles as well as around them.
- Two heavy duty solid gage wheels control height of cut.
- Three-point mounting is easy on and off aided by built-in parking stand.
- Hydraulic motor is coupled direct to rotor shaft.
- Self-contained hydraulic pump is driven by 540 R.P.M. P.T.O. drive line.
- Heavy duty taper roller bearings support rotor shaft.
- Manual control protects small trees and irrigation risers.
- Swings in and out around larger trees and posts automatically.
- Low profile permits reaching under low hanging limbs.
