

# FRONT MOUNT **TRANS-PORTER**

## **Series TP8300**

The Front Mount Trans-Porter is constructed of the same high quality materials as the rear mount. It can be used in conjunction with the rear mount Trans-Porter to carry a total tractor load of two bins . . . or to take the place of a dead weight counterbalance to make a more profitable pay load for a rear mount Edwards Trans-Fork.

- Can pick up load and set down load on up to 5-inch skid rails.
- A bin saddle attachment is available for positioning bins.
- Lifts 18 inches at lowest point.
- Tilts 9 degrees.
- Fits most makes of tractors.
- 1500 pound lifting capacity.
- The 3-Point Trans-Porter and Front Mount 3-Point Hitch can be used independently.

The Edwards Front Mount Trans-Porter combines the Edwards Front Mount 3-Point Hitch with the Edwards 3-Point Trans-Porter. See page 44 and page 4 for additional information on these implements.
